

The Platform team manifesto

As a Platform team, we believe in the following manifesto to guide our work towards achieving our desired engineering outcomes:

1. We prioritize a net positive for our software architecture in every epic, ensuring that each deliverable adds value to our overall system and doesn't create technical debt.
2. We are committed to successful epic delivery, meeting our deadlines and producing work that meets the highest standards of quality.
3. We believe in documented decisions and outcomes, creating a clear record of our thought processes and actions so that we can learn from them and improve over time.
4. We hold ourselves to a high standard of overall quality on our team's products, taking pride in our work and striving to produce solutions that meet or exceed our users' expectations.
5. We recognize the importance of good peer review, seeking feedback and input from our colleagues to ensure that our work is accurate, complete, and aligned with our team's goals and objectives.
6. We embrace collaboration and open communication, recognizing that our team's success depends on our ability to work together effectively and share knowledge and ideas with each other.
7. We are committed to continuous improvement, staying up to date with new technologies and methodologies and constantly seeking ways to improve our processes and deliverables.

By following this manifesto, we believe that we can build a strong, effective, and successful team that produces high-quality work and delivers value to our stakeholders.
