

No-Code, Extensions & Automation Workflows

Octoparse, browser extensions, userscripts, n8n, Make.com

- [No-Code Platforms](#)
- [Browser Extensions & Userscripts](#)
- [Automation Workflows \(n8n, Make, Zapier\)](#)

No-Code Platforms

No-Code / Low-Code Platforms

Platform	Pricing	Maps Feature	Notes
Octoparse	Free + \$69/mo	Auto search splitting to overcome 120-result limit	20K results/hour. Best no-code option
ParseHub	Free (5 projects) / \$189/mo / \$599/mo	JS rendering handles Maps SPA well	Steep price jump from free
WebAutomation.io	\$99-999/mo or \$1/1K PAYG	Pre-built Google Maps extractor	14-day unlimited trial
PhantomBuster	\$69-439/mo	Maps phantoms available	\$50-80/1K leads — 15-50x more expensive. NOT recommended for Maps

Browser Extensions & Userscripts

Browser Extensions & Userscripts

Tool	Type	Price	Notes
DataMiner	Chrome ext.	Free (500 pages/mo) to \$200/mo	Custom recipes, pagination, scheduled runs. No email extraction
Instant Data Scraper	Chrome ext.	Free	One-click, ~120 results cap. Unmaintained
Web Scraper (webscraper.io)	Chrome ext.	Free + cloud \$50/mo	No pre-built Maps template
GMaps Extractor	Chrome ext.	Free/Freemium	gmapsextractor.com. No coding needed
G Maps Extractor	Chrome ext.	Freemium	"Probably the cheapest" per Reddit
AI Web Scraper	Chrome ext.	Various	Multi-purpose: Reddit, Maps, LinkedIn, Amazon
Tampermonkey Reviews Exporter	Userscript	Free	Greasyfork . Adds "Scrape Reviews" button, auto-expands, exports JSON
webAutomationLover	Userscript	Free	Tampermonkey. Accumulates results as you browse, exports .xlsx
Firefox GPX Exporter	Firefox addon	Free	Export saved Maps lists as GPX with lat/lon

120-Result UI Limit: All browser extensions are capped by Google Maps' sidebar pagination (~120 results per search). Must split searches into smaller areas for more.

Automation Workflows (n8n, Make, Zapier)

Automation Workflows

n8n (Most Flexible)

- Official **Outscraper node** available
- Templates: Google Maps scraper, lead gen with Google Sheets export, email scraping
- **conor-is-my-name/google-maps-scraper**: Docker-based, designed for n8n + Postgres. Multi-container, IP rotation, 1 req/min/IP = ~144K/day
- **Gemini AI + n8n pipeline**: Use Google AI Studio to vibe-code scraping, pipe via webhook to Sheets
- Example pipeline: Apify scrape + Anymail Finder emails + Airtable storage
- Also works with official Google Maps API via HTTP Request node

Make.com

Scrap.io integration (200M businesses). Visual workflow builder, 3,000+ connectors. Automated lead gen tutorials available.

Zapier

Outscraper integration available. Simpler but less flexible than Make.com.

Clay

Data enrichment platform. Pull basic Maps data then enrich with Clearbit/Dropcontact. Filter by review count/recency for active businesses.

Google Sheets & Apps Script

- **Apps Script Maps Service:** built-in geocoding/reverse-geocoding without API keys.
Cannot do Places search
- **IMPORTFROMWEB add-on:** handles dynamic JS pages in Sheets (IMPORTXML fails on Maps)
- **Full cold outreach pipeline** (Apps Script v3.0): AI email writing, website discovery, CEO identification, Firecrawl scraping, email enrichment, dedup — all in one sheet
