

# Search API Proxies (SerpAPI, Serper, etc.)

## Search API Proxies

Services that handle scraping/anti-bot, returning clean JSON from Google Maps queries.

Service	Pricing	Speed	Notes
<b>SerpAPI</b>	\$50/5K queries	Standard	Market leader. Active DMCA lawsuit from Google (Dec 2025)
<b>Serper.dev</b>	~\$1/1K queries; \$0.30/1K at volume	~2.87s	2,500 free queries. SERP-based Maps results
<b>Scrapingdog</b>	\$0.33/1K	3.05s	100% success rate (benchmarked), fastest
<b>Scrape.do</b>	\$1.16/1K	1.73s	AI Overview detection
<b>ScraperAPI</b>	\$50/4K searches	Standard	Maps in all plans
<b>ScrapeBadger</b>	Competitive	Standard	Review support
<b>DataForSEO</b>	Pay-per-task	Standard	Maps SERP + reviews endpoints
<b>Oxylabs SERP</b>	From \$49/mo	Standard	Enterprise SERP API
<b>ValueSERP</b>	Various	~40s (slow)	Some user complaints
<b>Zenserp</b>	From \$30/mo	Standard	Multi-engine support

## SerpAPI Details

Accepts standard Google Maps query syntax (`q=restaurants+in+Berlin`), returns structured JSON with: title, address, phone, rating, reviews, hours, service\_options, GPS coordinates, place\_id, data\_cid, price, type, photos, thumbnails.

Separate endpoint for individual place reviews.

**Legal warning:** Google v. SerpAPI (Dec 2025) — active DMCA lawsuit with ruling pending.
